

Dear resident,

In 2023, the City will begin construction of a dry storm pond in Weaver District Park which, once complete, will reduce the flood risk for several properties in your neighbourhood during intense rain events.

You are invited to a come-and-go event to learn more about the upcoming project:

Tuesday, October 18, 2022
John Lake School Gym
7:00 p.m. – 8:30 p.m.

This is where you will have an opportunity to talk about the new dry storm pond with City staff, provide feedback, and ask any questions you may have. Prior to the event, it would be beneficial to view a recorded presentation that includes background information as well as renderings that show what the dry storm pond will look like and how it will function. If you have not yet done so, please visit [saskatoon.ca/engage](https://www.saskatoon.ca/engage) and open the “Weaver Park Redesign” tile (direct link to the page: <https://www.saskatoon.ca/engage/weaver-park-redesign>).

The Weaver Park Dry Storm Pond Project will be the third of 9 under the Flood Control Strategy (FCS). For more information about the FCS, visit [saskatoon.ca/floodplan](https://www.saskatoon.ca/floodplan).

In the meantime, please feel free to contact me if you have any questions.

Thank you,

Mitch McMann
